Profile

JavaScript enthusiast with a high interest in many related technologies in the JavaScript ecosystem, heavily focused on React.js.

Related experience

E-commerce web app
DECEMBER 2020

Project-based, I have managed to recreate a fully functional and scalable e-commerce platform with Firebase Authentication, Firestore database, and Stripe payment. Included Redux as state management, custom hooks, and ContextAPI.

Demo: https://www.krsteski-e-com.herokuapp.com

Netflix Clone
AUGUST 2020

Created a clone of the popular Netflix platform with Styled Components, user-authentication, connected to a real-time database with Firebase.

Demo: https://www.krsteski-netflix.herokuapp.com

And other projects worth mentioning
That you can find here

Employment History

McDonalds Germany, Berlin
MARCH 2017 — MARCH 2020

Operations Menager, Hardware Store, Prilep, North Macedonia
SEPTEMBER 2010 — SEPTEMBER 2013

As an operations manager, I was mainly implementing the right processes and practices across the organization and the store. I was highly involved in the financial strategy and operation strategy by improving performance, procuring material and resources. Also involved in making tenders and proposals for our business customers.
